Innov8ors Cohort III Registration of Interest

Greetings!

Startup Gladstone Inc is excited to announce the upcoming launch of the Innov8ors Cohort III program this year, in partnership with Split Spaces Mackay. This program is designed for existing businesses and founders who have identified a market need or a Corporate-led challenge and are seeking to find a scalable solution to take to market.

The program is a 16-week accelerator that includes a startup bootcamp, mentoring, and end-to-end product/service development. It provides the perfect platform for early-stage projects to transition into full-scale business opportunities.

Innov8ors prioritizes high-impact, scalable, and innovative organisations/founders developing solutions to identified Corporate-Led/business ideas within the Gladstone Region. We invite interested participants to register their interest, and we will send more information and forms in the coming months.

Our goal is to support the development of startups, collaborative partnerships, jobs creation, and skills attraction to strengthen Gladstone Region's innovation ecosystem.

Thank you for registering your interest, and we will be in contact with you soon.

Best regards,

Maria Cabral Fernandes
